

Installing Domino Servers and Notes Clients

---

# Contents

## Chapter 1. Deploying Domino . . . . . 1

Installation . . . . .	1
Guidepost for deploying Domino . . . . .	1
Building the Domino environment. . . . .	11

## Chapter 2. Setting Up the Domino Network . . . . . 13

Setting Up the Domino Network . . . . .	13
Lotus Domino and networks . . . . .	13
Network security . . . . .	16
Planning the TCP/IP network . . . . .	20
Planning the NetBIOS network . . . . .	39
Setting up Domino servers on the network . . . . .	41
Server setup tasks specific to TCP/IP. . . . .	49
Server setup tasks specific to NetBIOS . . . . .	59

## Chapter 3. Installing and Setting Up Domino Servers. . . . . 61

Installing and setting up Domino servers . . . . .	61
Domino server evaluation software license . . . . .	61
To install and set up a server . . . . .	61
Entering system commands . . . . .	62
Server installation . . . . .	62
Installing Domino on Windows systems . . . . .	63
Installing Domino on Linux on zSeries systems . . . . .	66
Using the express install . . . . .	70
Disabling Concurrent I/O and Direct I/O on Domino servers on AIX . . . . .	70
The Domino Server Setup program . . . . .	71
Using Domino Off-Line Services (DOLS) and Domino Web Access . . . . .	73
Setting up DOLS on a server . . . . .	73
Setting up Domino Web Access on a server. . . . .	75
Setting up Domino Web Access with IBM Lotus Sametime . . . . .	75
Using the Domino Server Setup program . . . . .	82
Indic language support in the Domino Server Setup program . . . . .	82
Using the Domino Server Setup program locally . . . . .	83
Using the Domino Server Setup program remotely . . . . .	84
Creating a server setup profile . . . . .	86
Using a server setup profile . . . . .	88
Using silent server setup . . . . .	90
Using automatic server setup on Linux on zSeries and on UNIX. . . . .	93
The Certification Log . . . . .	94
Server registration . . . . .	95
Registering a server . . . . .	96
Optional tasks to perform after server setup . . . . .	98
Creating an additional organization certifier ID . . . . .	99
Creating an organizational unit certifier ID . . . . .	100
Internet Site documents . . . . .	101
Starting and shutting down the Domino server . . . . .	108
To start the server . . . . .	109

To shut down the server. . . . .	109
Starting Domino as an application or a Windows service . . . . .	109
Using instant messaging in the Domino Directory . . . . .	110

## Chapter 4. Setting Up and Using Domino Administration Tools . . . . . 111

Installing the Domino Administrator. . . . .	111
The Domino Administrator . . . . .	111
Setting up the Domino Administrator . . . . .	111
Starting the Domino Administrator . . . . .	112
Navigating Domino Administrator . . . . .	112
Server pane . . . . .	112
Task pane . . . . .	112
Results pane. . . . .	112
Tools pane . . . . .	112
Window tabs . . . . .	112
Domains . . . . .	112
Bookmark bar . . . . .	113
Selecting a server to administer in the Domino Administrator . . . . .	113
To update a server list . . . . .	113
Setting Domino Administration preferences . . . . .	113
Setting Basics preferences . . . . .	114
Setting Files preferences . . . . .	115
Setting Monitoring preferences . . . . .	116
Setting Registration preferences . . . . .	117
Setting Statistics preferences . . . . .	119
Tools and preferences for debugging in the Domino Administrator . . . . .	120
Domino Administrator tabs. . . . .	121
People and Groups tab in the Domino Administrator . . . . .	121
Files tab in the Domino Administrator . . . . .	121
Server tabs in the Domino Administrator . . . . .	122
Messaging tabs in the Domino Administrator . . . . .	122
Replication tab in the Domino Administrator . . . . .	123
Configuration tab in the Domino Administrator . . . . .	123
Domino Administrator tools . . . . .	123
Web Administrator . . . . .	124
Setting up the Web Administrator . . . . .	124
Web browser requirement . . . . .	125
Domino server tasks required . . . . .	125
To set up the Web Administrator . . . . .	125
Setting up access to the Web Administrator database . . . . .	125
Giving additional administrators access to the Web Administrator . . . . .	126
Administrator roles in the Web Administrator . . . . .	127
Starting the Web Administrator . . . . .	128
To start the Web Administrator . . . . .	128
Using the Web Administrator . . . . .	128
Accessing online help . . . . .	129
Additional buttons . . . . .	129

Setting Files preferences for the Web Administrator . . . . .	129
Registering users and servers with the Web Administrator . . . . .	130
Managing policies with the Web Administrator	130
Using the Web Administrator consoles . . . . .	131
Message tracking in the Web Administrator . . . . .	131
Editing the NOTES.INI file and cleanup script in the Web Administrator . . . . .	132
Signing out of the Web Administrator . . . . .	132
The Server Controller and the Domino Console . . . . .	132
Starting and stopping the Server Controller . . . . .	132
Starting and stopping the Domino Console . . . . .	133

**Chapter 5. Planning for Notes client installation and upgrade. . . . . 135**

Products to install and order of installation . . . . .	135
Servers to install . . . . .	135
Clients to install . . . . .	135
Lotus Notes installation documentation roadmap . . . . .	136
Lotus Notes pre-installation checklist . . . . .	137
Considerations before installing Lotus Notes on Windows . . . . .	138
Considerations before installing Notes on Linux	140
Installing the WebSphere Portal composite application support for Lotus Notes . . . . .	141
Specifying the home portal account using policy	144
Specifying the home portal account using preferences . . . . .	144
Setting up client installation and installation methods . . . . .	145
Before you install Lotus Notes clients . . . . .	146
Installation methods . . . . .	146
Customizing client installations using the tuner	147
Creating a transform file . . . . .	147
Using installation options with the transform file . . . . .	148
Examples -- Applying scriptable setup using a transform file during Notes client installation	150
Using transform files for end-user installations	151
Customizing Notes installation using the install manifest . . . . .	153
Customizing the installer process. . . . .	154
Understanding the Eclipse update site . . . . .	154
Customizing Notes install using tuner capabilities . . . . .	155
Customizing the Notes install manifest to add or modify access to Eclipse features . . . . .	155
Customizing Notes installation for supplied Eclipse features. . . . .	155
Customizing Notes installation for new or third-party Eclipse features. . . . .	157
Adding new features to the Notes install kit using a command line tool . . . . .	159
Considerations . . . . .	159
Command line options . . . . .	160
Procedure . . . . .	160
Installing and subscribing to preset feeds . . . . .	161
Controlling preset feeds prior to Notes install	161
Adding preset feeds . . . . .	161

Removing preset feeds . . . . .	161
Subscribing to preset feeds after Notes install	161
Changing feed subscription after subscribing to preset feeds . . . . .	161
Customizing Notes using the plugin_customization.ini file . . . . .	162
Using Notes client single logon to synchronize Notes and OS passwords . . . . .	162
Keeping a pre-Notes 8 version on Windows . . . . .	163
Using Language Pack Installer with Domino . . . . .	164
Instant messaging and client installation and setup	165
Enabling Single Sign-On for instant messaging	165
Scriptable setup and instant messaging. . . . .	165
Name awareness in view columns and names fields . . . . .	166
Instant messaging and policies . . . . .	166
Installing Notes in a single user environment. . . . .	166
Installing and upgrading to Notes on Windows for a single user . . . . .	167
Installing Lotus Notes in a multi-user environment	169
Installing Lotus Notes multi-user on a Windows client . . . . .	170
Installing Lotus Notes multi-user on a Linux client . . . . .	170
Multi-user install with multiple language Notes clients . . . . .	170
Installing and upgrading to Notes on Windows for multi-user . . . . .	171
Installing Notes on Linux . . . . .	173
Using the Multi-user Interface pack . . . . .	175
Updating, adding, and removing installed Notes features . . . . .	176
Running the Notes client as a user after updating, adding, or removing Notes features	177
Automating client installation using a silent install	177
Running a silent installation . . . . .	177
Installing to a non-default directory . . . . .	178
To use Notes silent installation on Windows . . . . .	178
To use Notes silent installation on Linux . . . . .	179
Providing a batch file for installing the Notes client . . . . .	180
Providing command line utilities for installation	181
Setting up Notes with a scriptable setup . . . . .	181
Installing the Domino clients in a shared network directory . . . . .	185
Upgrading shared installations . . . . .	185
To set up the shared network installation . . . . .	185
Enabling and using third-party feature installation and update in Notes . . . . .	186
Creating custom or third-party features. . . . .	186
Signing custom or third-party features and plug-ins for install and update . . . . .	187
Signing and adding new features to the install kit . . . . .	188
Using the plugin_customization.ini file to verify trust . . . . .	189
Using Domino policy to verify trust. . . . .	190
Installing and updating custom and third-party features and plug-ins. . . . .	191
Creating features and plug-ins. . . . .	191
Signing features and plug-ins . . . . .	191

- Installing a new feature using the Notes install manifest . . . . . 192
- Enabling user-initiated update. . . . . 192
- Creating and using a traditional third-party installer . . . . . 192
- Creating and using an NSF-based update site 196
- Configuring component update for composite applications . . . . . 198
  - Domino Update Site NSFs . . . . . 199
  - Creating and preparing the NSF-based update site. . . . . 199
  - Editing a Composite Application's feature requirements update site URL. . . . . 200
  - Retrieving composite application definitions (CA XML) from Domino. . . . . 201
  - WebSphere Portal and Composite Applications Resources for learning more about composite applications . . . . . 202

**Chapter 6. Upgrading Notes clients 203**

- Before you upgrade the Notes client. . . . . 204
- Using Upgrade-by-mail . . . . . 205
  - Before you use Upgrade-by-mail . . . . . 205
  - Backing up Notes client files . . . . . 205
  - Creating the upgrade notification for Upgrade-by-mail . . . . . 207
  - Installing the Lotus Notes software with Upgrade-by-mail . . . . . 207
  - Upgrading the mail file template with Upgrade-by-mail . . . . . 208
- Using Notes Smart Upgrade . . . . . 208
  - Prerequisites. . . . . 208
  - Procedure . . . . . 208
  - Smart Upgrade server failover to another clustered server . . . . . 209
  - Creating a Lotus Notes Smart Upgrade database 209
  - Smart Upgrade Tracking Reports database. . . 210
  - Controlling the number of concurrent Smart Upgrade downloads . . . . . 211
  - Creating a database link to the Smart Upgrade Database . . . . . 211
  - Adding update kits to the Lotus Notes Smart Upgrade database. . . . . 212
  - Running a silent upgrade using optional arguments . . . . . 216
  - Creating a Lotus Notes Smart Upgrade desktop policy settings document . . . . . 218
  - Using Smart Upgrade to run a series of client upgrades . . . . . 220
  - Notes users and Lotus Notes Smart Upgrade 220
  - Maintaining Lotus Notes Smart Upgrade . . . 221
  - Using the Smart Upgrade Run-As wizard . . . 221
  - How Smart Upgrade performs an upgrade . . . 223

**Chapter 7. Uninstalling Notes . . . . 225**

- Uninstalling Notes from a Windows client. . . . 225
- Uninstalling Notes from a Linux client . . . . 225
- Uninstalling Notes silently . . . . . 225
  - Microsoft Windows . . . . . 226
  - Linux . . . . . 226

- Cleaning a previous Notes 8 installation from your client . . . . . 226
  - System on which a Lotus Notes 8 Beta 2 or earlier beta version was installed. . . . . 226
  - Cleanup instructions for Windows -- Lotus Notes 8 Beta 2 or earlier. . . . . 226
  - Cleanup instructions for Linux -- Lotus Notes 8 Beta 2 or earlier . . . . . 227
  - System on which a Lotus Notes 8 Beta 3 version, or partially installed Lotus Notes 8 version, was installed:** . . . . . 227
    - Cleanup instructions for Windows -- Lotus Notes 8 Beta 3 or later: . . . . . 228
    - Cleanup instructions for Linux -- Lotus Notes 8 Beta 3 or later: . . . . . 228

**Chapter 8. Setting up Domino and DB2 . . . . . 229**

- Domino and DB2 user accounts that are needed for Domino and DB2 . . . . . 229
  - Accounts required with Microsoft Windows . . 229
  - Accounts required with AIX/UNIX/Linux . . 229
- Domino and DB2 supported platforms and configurations . . . . . 230
  - Supported platforms and hardware and software requirements . . . . . 230
  - Supported configurations in Domino and DB2 231
- Installation and setup procedures. . . . . 235
  - Installing Domino and DB2 on Microsoft Windows platforms . . . . . 235
  - Installing Domino and DB2 on IBM AIX and Linux platforms . . . . . 236
  - Setting up the Domino server environment for use with Domino and DB2 . . . . . 237
  - Creating the DB2 installation account . . . . 238
  - Installing and Setting up DB2 on Microsoft Windows. . . . . 238
  - Installing DB2 on IBM AIX and Linux platforms 239
    - Creating the DB2 administrator and administration server account . . . . . 240
    - Create the DB2 primary groups . . . . . 241
    - Creating the DB2 user accounts and adding the users to groups. . . . . 241
    - Determining whether you have a SYSCTRL group . . . . . 241
    - Manually creating the Domino server user account and the DB2DOM group. . . . . 242
    - Designating the DB2DOM group a system control group and adding the Domino server user to the system control group . . . . . 242
    - Enabling the Domino server to communicate with the DB2 server . . . . . 243
    - Granting SETSESSIONUSER privilege to the Domino server user . . . . . 248
    - Using a remote DB2 server with server enablement . . . . . 249
    - Creating a server ID for the DB2 Access server 251
    - Installing the DB2 Access server on the DB2 server . . . . . 253
    - Mapping the DB2 ID to a Notes ID in the Domino server's Domino Directory . . . . . 255

Setting and enabling a default DB2 user ID for  
use with query views. . . . . 258  
IBM AIX and Linux post-installation validation  
procedure . . . . . 259

**Index . . . . . 261**
